For Immediate Release

JonesCAM is adding another camera system to its world-renown line-up of digital video recorder systems. The new patents pending system is appropriately named, "Aire Jones"TM. From amateurs to pro's to event producers, everyone wants to see big air, themselves and friends, especially when sweet tricks and awesome pulls are being made, thus the name "Aire Jones". When recently debuted at a NY boats show to dealers selling the biggest name boats in this exploding market, the dealer's comments were "I wish I thought of this" and "It's the answer to a common question, how do I record our tricks"?

For over 12 years JonesCAM has worked for clients like NASA, Boeing, Lockheed Martin, Cessna, Rockwell Collins, and Harley, to TV and movies producers for Will Smiths movie "I Am Legend", Fox FLW fishing shows to World Champions of Offshore racing, JBS Racing has 8 cameras and the same JC-2 PVR's on its 52' offshore race boat. The same high quality they're delivered will produce first class DVD's and You Tube videos for you and to share. Are you an events producer or camp owner? Use it for live promotions, sponsorship needs and killer parties, from the boat via its optional wireless system.

JonesCAM's Aire Jones camera and mount is designed to be used with JonesCAM's JC-2 solid state recorder. The rotating camera mount is attaches to your boats pylon by its uniquely designed, friction-free or needle/roller bearing ring collar. Its rope guide surrounds the rope and directs the camera to the perfect position for recording. The adjustable camera mount can be raised up or down to the wake, ski or surf zone. The mounts pylon collar is designed to match the boats pylons location/diameter and the mounts riser adjust in height too. Aire Jones camera mount is available in polished stainless steel or aluminum and in custom anodized colors to match many boats.

The Aire Jones JC-2 PVR produces the highest quality 720 x 480 lines of resolution MPEG2 and MPEG4 videos on the market at 8 Mbps. The solid state JC-2 provides live video on its 2.5" LCD color screen and if available, your boats dash LCD screens. Need a LCD? Weatherproof screens are available as an option. With a solid state capacity of 16 GB, the user has the ability to record an entire day knowing every flip, spin, crash and pull will be recorded at the best quality level available in MPEG 2 or 4. Other features include wireless video transmission, and GPS connectivity and remote controls. Boat owners, dealers, schools and camps have several pro quality camera choices starting with JonesCAM's waterproof 560 lines of resolution, OSD color camera offering auto and manual OSD controls featuring backlight, white balance and shutter speed adjustments. Other camera choices include optical zoom, video stabilization, and waterproof housings.

Whether you own a Malibu, MasterCraft, Nautiques, Supra, Moomba, Cobalt, etc., our patent pending designs is your audio/video recording and wireless solution. The unique yet stylish system is perfectly designed to subtly add to every boats looks, not distract from it. After all, you have a beautiful boat and the Aire Jones system was designed to compliment it and record your best stuff… The entire package with recorder starts at just over \$1100.00, making this sweet package affordable by everyone. The idea behind JonesCAM video camera systems is simple: capture unforgettable video footage worthy of showing others, period... JonesCAM’s website www.JonesCAM.tv has pictures and details of the Aire Jones system to wet your appetite. Pre-orders are encouraged and can be placed by calling JonesCAM at (518) 746-5802. The distribution schedule is planned for the first week in June, making the products launch just in time for 09’ summer activities.
